

RISIO®

retainers

Smiles
that last longer

Maintain results with our state-of-the-art RISIO removable retainer.

Our new and most advanced retainers are engineered to maintain long lasting results after orthodontic treatment is complete.

The name RISIO is a Latin word meaning smile and laughter. The aim of our new retainer product is to ensure your patients continue to laugh and smile with the confidence that their new smile will be maintained.

At ALS Dental, we are the proud leading supplier of orthodontic appliances in the UK. We invest heavily in innovative dental machinery and currently operate the largest 3D printers in the UK. With over 20 years' experience, we produce over 15,000 retainers each month providing fantastic orthodontic solutions for our dentists and their patients. We trim hundreds of retainers in minutes with our automated trimming system which guarantees superior end results for our products.

By using the best performing dental materials available on the market our RISIO retainers are comfortable and virtually invisible. This ensures your

patients maintain long lasting results post orthodontic treatment with maximum comfort and minimum hassle.

As a dentist, ordering RISIO retainers for your patients will give you peace of mind knowing your patients are receiving the best product on the market to preserve the fantastic results obtained through their alignment treatment.

What are RISIO retainers?

RISIO is our cutting-edge post-orthodontic retention solution designed to be effective and efficient whilst causing minimal disruption to the patients' daily life.

At RISIO, we understand your patients are likely to have undergone a lengthy and laborious teeth straightening process. Therefore RISIO aims to provide the most effective fuss-free solution to maintaining remarkable results.

RISIO is clear, durable and custom-made for each of your patients.

What are the benefits of RISIO?

1. A tighter fit to improve retention and comfort

The custom-made fit is created to be snug to the teeth and the materials we use ensure it does not stretch or become loose over time.

2. Stain repellent

The material used for RISIO maintains the retainers clarity as well as reducing stains and imperfections on the plastic.

3. Stronger and super durable retainer

Breakages are common with some retainer brands so RISIO is engineered to provide a durable solution that requires less maintenance. RISIO is a long-term solution that maintains lasting results, ensuring your patient requires no further treatment.

Why choose RISIO?

1

State-of-the-art manufactured retainer designed to endure everyday usage with minimal maintenance.

2

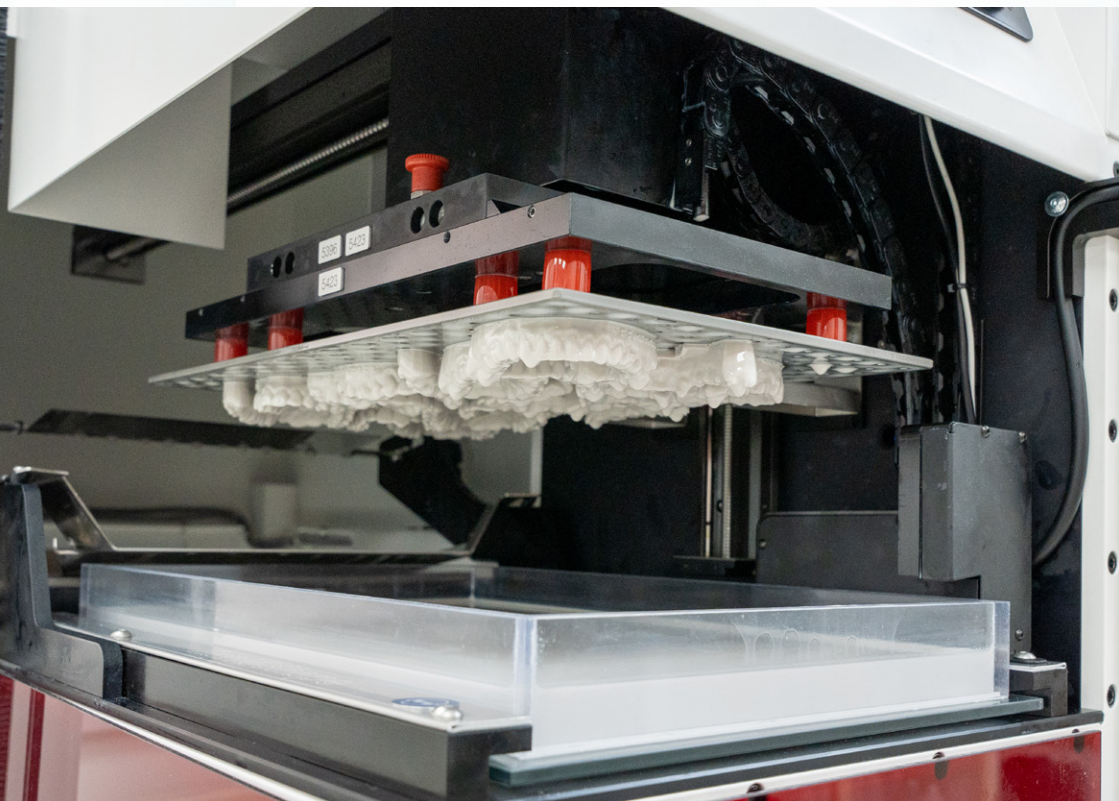

Uniquely designed to meet patients' specific requirements in upper and lower teeth.

3

Users preserve long lasting results of treatment with the comfort of near invisible removable retainers.

4

Manufactured by the UK's leading manufacturing group to be effective, efficient and provide long lasting results.

RISIO – made to last!

Give your patients the post-orthodontic treatment they deserve.
