# Modern Dentures for Modern Lives

High quality digital  
dentures fitted in just  
two appointments

## **Live your best life with Dentuvo Digital Dentures**

Dentuvo Digital Dentures are an innovative denture product from the ALS Dental Group which utilises digital technology to produce a fantastic range of top quality dentures.

Whether you are going NHS or private and whether you need a full set of dentures or partial replacements, Dentuvo has the solution. Comfortable, customised and secure; our dentures look and feel like natural teeth, delivering a practical and aesthetically pleasing solution that enhances your quality of life.

## Your Denture - ready in just two weeks

Our advanced manufacturing processes use the latest technology to produce high-quality custom dentures in just two weeks. This rapid turnaround allows you to quickly regain comfort, functionality and confidence.

## Unprecedented levels of accuracy, comfort and characterisation

Our digital design technology enables Dentovo dentures to achieve exceptional precision and comfort by exactly replicating the scanned surfaces of your mouth. This results in a superior fit and customization compared to traditional dentures.

## Enjoy every bite

Dentovo Dentures are made from premium, durable materials, making them stronger and less prone to breakage than traditional dentures. This superior strength allows you to enjoy your favourite foods with confidence.

## Make sure you are never without your Denture

We recommend having an extra set of dentures in case of accidents or when travelling. You can order a second set at any time and because your digital scan is kept on file, reordering is easy and you can receive your denture really fast.

## **Dentures in only two appointments**

Our CAD/CAM processes in 3D printing and milling mean you only need two dentist visits: one for a scan or impression and a second to fit your denture.

The entire process takes just 45 minutes in the dentist chair, compared to traditional, analogue dentures, which require five appointments and will take over a month or more.

## Dentuvo Options

We understand that patients have different needs, expectations and price sensitivities so we have developed four levels: bronze, silver, gold and platinum, in a great range of shades. Bronze is a great option for NHS patients and Silver to Platinum are available privately. Your Dentist will explain the characteristics on each level so you can decide which is the best for you.

## Ask for a annual subscription – Dentuvo Life

Ask your dentist to set up Dentuvo for you on an subscription basis so you get a brand new Dentuvo Denture every year.

## Where can I get Dentuvo from?

Ask your Dentist about Dentuvo Digital Dentures today or contact us and we will put you in touch with one of our Dentists who specialises in them for us.
