clear aligners

Smiles proudly
made in the UK

Why choose RISIO Clear Aligners

Manufactured & distributed in the UK

RISIO Aligners are manufactured & distributed by ALS Dental, the UK's largest dental manufacturing group. Treatment planning, manufacture and distribution is all done in the UK, ensuring you have the highest quality products, local customer service and the quickest turnaround times in the industry, just 5 days from case approval to practice.

Produced at the ISO 13485:2016 accredited Ashford Orthodontics, the UK's leading Orthodontic Laboratory

ALS Dental's Ashford Orthodontic site in Sunderland is the UK's leading and most advanced orthodontic manufacturing facility and is a dedicated expert in aligner and retainer production. All our products are produced by highly trained orthodontic technicians using the latest automated 3D printing and manufacturing technology.

The Ashford state-of-the-art facility is flagship for dental manufacturing in the UK and receives many visitors each year.

At Ashford, we have the most up-to-date equipment and production techniques available and are at the forefront of innovation and product development.

Ashford's recent attainment of the ISO 13485:2016 accreditation is a testament to the top quality and service you will receive with RISIO Clear Aligners and underlines our dedication to setting the highest standards of quality, safety, and excellence in the fields of orthodontics and dental care.

Accessible pricing for dentists & patients

If you choose RISIO you are choosing to come direct to the UK's top aligner manufacturer. We are able to offer accessible prices that are not loaded with global supply chain and marketing cost.

Touch up aligners

If your patient requires extra aligners after the treatment is complete, we offer 5 refinement aligners based on two rounds of treatment plan adjustments free of charge to ensure total customer satisfaction.

A Greener option through UK manufacture & supply chain

Our packaging is completely recyclable. Additionally, unlike other major aligner providers who manufacture and outsource overseas we have full control of our supply chain which means we can minimise our environmental impact as products do not need to be imported or flown long distances. This means we reduce the carbon footprint as well as ensure a slicker, faster service for dentist and their patients. Today patients are increasingly passionate about the environment, so RISIO is a greener choice.

About RISIO Clear Aligners

Our aligners offer a clear, discreet and effective solution for patients seeking orthodontic treatment. They are a great alternative to traditional metal braces, making them a popular choice for both adults and teenagers. Our aligners are made with state-of-the-art technology, ensuring precise and accurate treatment for your patients.

Our clear aligners are also easy to use, with no wires or brackets to worry about. They are comfortable to wear and can be removed for eating, brushing and flossing, making oral hygiene a breeze. This means less chair time for your patients, and fewer adjustments required.

RISIO Clear Aligners are designed to deliver fantastic results in a shorter amount of time than traditional braces. They are perfect for patients looking for a fast and effective treatment option that won't impact their daily lives.

Create fantastic results with RISIO Clear Aligners

Our clear aligners can be used to treat a wide range of orthodontic issues, including crowded teeth, gaps, overbites and underbites. Our team of experienced technicians will work with you to create a treatment plan that is tailored to your patient's specific needs.

Our clear aligners use advanced 3D computer imaging technology to ensure precise and accurate treatment. The aligners are custom-made for each patient, ensuring a perfect fit and maximum effectiveness. Our clear aligners are also designed to be worn for a shorter period of time than traditional braces, which means that your patients will see results faster.

RISIO Clear Aligners are a great option for patients who want to improve their smile without the hassle and visibility of traditional braces. With our clear aligners, your patients can achieve the smile they've always wanted without sacrificing their appearance or lifestyle.

What are the benefits of RISIO Clear Aligners

- 1 Comfortable to wear
- 2 Easy to remove for eating, brushing, and flossing
- 3 Clear and discreet design
- 4 Intuitive treatment planning system
- 5 High grade material less likely to tear or break
- 6 Shorter treatment time compared to traditional braces

How do RISIO Clear Aligners work

RISIO Clear Aligners work by gently and gradually shifting the teeth into their desired position. They are designed to be worn for 20-22 hours a day, with occasional breaks for eating and oral hygiene. Each set of aligners is worn for about two weeks before being replaced with the next set in the treatment plan.

The aligners exert a small amount of force on the teeth, which causes them to move gradually into the desired position. As the teeth shift, the aligners are gradually replaced with new sets to continue the treatment process. The entire treatment process is monitored by our team of orthodontists to ensure that the teeth are moving as planned and to make any necessary adjustments.

RISIO Clear Aligners are a great option for patients who want aligners that are comfortable to wear, easy to use, and deliver fantastic results in a shorter amount of time.

What type of cases are suitable for RISIO Clear Aligners

RISIO Clear Aligners can be used to treat a wide range of orthodontic issues, including:

- Crowded teeth
- Gaps
- Overbites
- Underbites
- Mild to moderate spacing and crowding
- Minor rotation and torque corrections
- Mild to moderate deep bite and open bite cases

Our clear aligners are suitable for both adults and teenagers and are a great option for patients looking for a fast and effective treatment option that won't impact their daily lives. They are also a good choice for patients who want to improve their smile.

It is important to note that in certain cases, traditional braces may be more suitable. Our teams at Ashford and Veus will work with you to determine the best treatment plan for your patients.

ALS Dental Group

ALS Dental is the largest dental manufacturing group in the UK with the mission to build Europe's leading, most innovative and technologically advanced dental manufacturing business.

If you choose RISIO you are choosing a product backed by the well-established ALS Dental Group and means that the group quality standards are always adhered to. As a leader in the industry, ALS continually strives for excellence in service levels and products. The strength of a group behind all ALS Laboratories and businesses give access to funding, up-to-date resources, knowledge and expertise and dentists the assurance they are dealing with a highly professional organisation.
